

INGEST, EDIT, ARCHIVE, MANAGE, DELIVER!

High Performance Storage and LTO Archival

TOLIS Group's ArGest® Studio Rack 1U and ArGest® Mobile Desktop Cube

Portable Archive and Ingest - The Road is No Longer a Dangerous Place For Your Data

TOLIS Group's ArGest® LTO with integrated 2-16TB SSD or 4-8TB HDD onboard storage units are self contained portable kits that provide incredibly fast high-speed storage and industry standard LTO backup and archival in a single, quiet, easy to use road warrior configuration for editors, videographers, music production/front of house teams, photographers, and other creative artists in the field.

You shouldn't have to wait; ArGest makes sure that you won't!

The ability to ingest a REDMag at full performance, while editing a 5K sequence and archiving footage to LTO-5, LTO-6, LTO-7, or LTO-8 media at full speed from the same late-model Mac Book Pro means that you can spend more time doing what you want to do with your data instead of waiting for your data to become available on your portable system while on location.

With sustained Thunderbolt 1 media ingest speeds of up to 800MB/sec (SSD systems) or 1.4GB/sec (Mac Pro), 500MB/sec (HDD systems), LTO-7 and LTO-8 speed averaging 322MB/sec, and LTO-6 speeds of over 180MB/sec (.65TB/hour) using your choice of ArGest® Backup or ArGest® BRU Server™ software (included), the road is no longer a dangerous place for jobs generating large amounts of data.

PRODUCT HIGHLIGHTS

Available in SSD and HDD rack mount and desktop configurations - performance and capacities for most budgets

Easily connected via SAS or Thunderbolt - full performance and plug and play operation in either configuration

The ArGest® Cube is over 40% quieter than other external tape devices (even ours) - quiet operation means that you hear what you're editing, and are not distracted by loud fans

Easily perform ingest, edit and archival operations simultaneously - performance of over 1GB/sec (SSD) and 500MB/sec (HDD) means you don't have to choose one task over another

Long Life, enterprise class disks and long term LTO-based storage life - 2+ Million hours MTBF 2.5" disk and 50+ years LTO storage mean that you only need to worry about getting the shot rather than if you'll be able to actually edit it later

ArGest® Backup and ArGest® BRU Server™ software make archiving a snap - whether you're a one person shop, or part of a major studio operation, the BRU software solutions provide easy to use operation and easy to share archives thanks to BRUsetta Stone "wrap" CD/DVD and easy tape import
